

## Assignment #6b

## PROG6b.BAS

### Parallel arrays - population and manipulation.

#### Input:

- a) There is no user input for this program.

#### Processing Requirements:

- a) Write a program that assigns all the even numbers between 0 and 19 to an array named evenNumbers and all the odd numbers to an array named oddNumbers.
- b) Total the values in each array.
- c) Output the elements in each array to the screen with the total value shown below each column as in the output screen below.

#### Output:

OUTPUT SCREEN			
Even	Numbers	Odd	Numbers
	0		1
	2		3
	4		5
	6		7
	8		9
	10		11
	12		13
	14		15
	16		17
	18		19
	---		---
	90		100
