

Assignment #9g

PROG9g.BAS

The All-American Automobile Association (AAAA) needs a program that will help car owners in the state of Alabama determine the month in which their license should be renewed and the cost of AAAA dues. The renewal month is based on the first letter of the driver's last name, according to the following schedule:

A-F	January
G-L	February
M-Q	March
R-Z	April

The fee is:

Membership in the Automobile Association:	\$19.00
Non-membership	\$22.00

Input:

1. Prompt the user to enter the driver's last name
2. Prompt the user to enter whether the driver is a member of AAAA.

Processing Requirements:

1. Write a function to determine the renewal month.
2. Write a function to determine the cost of the license.
3. Allow the user to enter as many drivers as desired.

Output:

The last name, month of renewal, and license cost should be displayed on the screen. Interactive sessions should look similar to the following:

```
Enter the driver's last name: Miller
Are you a member of the Automobile Association (Y/N)? Y
```

Name	Renewal Month	Fee
Miller	March	\$19.00

```
Do you have more drivers to process (Y/N)? N
```
